Summary

Aspiring Machine Learning Engineer with experience in building and deploying ML and LLM-based systems using Python, Scikit-learn, and FastAPI. Skilled in data preprocessing, model evaluation, and Retrieval-Augmented Generation (RAG) systems. Passionate about solving real-world problems using AI-driven solutions.

Education

KIIT University, Bhubaneswar Expected Apr. 2027
Bachelor of Technology in Computer Science and Engineering

BR DAV Public School Class XII (2023)
Central Board of Secondary Education (CBSE)

BR DAV Public School Class X (2021)
Central Board of Secondary Education (CBSE)

Professional Experience

CodeAlpha Jun. 2025 – Sep. 2025
Machine Learning Intern Python, Scikit-learn, Streamlit

- Developed supervised machine learning models using [Random Forest](#) and [Logistic Regression](#) for Diabetes Prediction and Creditworthiness Assessment.
- Performed [data pre-processing](#), feature scaling, and [model evaluation](#) using F1-score and ROC-AUC.
- Built ML models achieving 87% accuracy on diabetes prediction dataset.

AWS Academy Apr. 2025 – Jun. 2025
Data Engineering Intern AWS SageMaker, Python

- Completed a 10-week internship in [Machine Learning](#) and [Data Engineering](#).
- Trained and deployed ML models using [Amazon SageMaker](#) on AWS Cloud.

Projects

Krishi-AI

AI-powered Agriculture Advisory Platform

- Built an AI-powered agriculture platform with chatbot, fertilizer recommendation, and crop disease detection using machine learning models (Random Forest, Logistic Regression).
- Integrated real-time weather data and government schemes to enable data-driven decision-making for farmers.
- Achieved 82% accuracy in fertilizer recommendation using a Random Forest model.
- Live Demo: [krishi-ai-sigma.vercel.app](#)

Fact-Check LLM

AI-powered Misinformation Detection System

- Developed a multimodal AI system to detect and verify claims from text, images, and audio using Retrieval-Augmented Generation (RAG)
- Built a pipeline using Mistral LLM, LangChain, and ChromaDB for claim verification and semantic similarity search
- Implemented clustering-based memory using cosine similarity for continuous learning of misinformation patterns
- Deployed full-stack application using FastAPI (backend) and Next.js (frontend)
- Live Demo: [fact-check-llm.vercel.app](#)

Skills

Programming:

Python, SQL, JavaScript

Machine Learning:

Supervised Learning, Classification, Regression, Logistic Regression, Decision Tree, Random Forest, SVM, XGBoost, Model Evaluation (F1-score, ROC-AUC)

Deep Learning & NLP:

CNN, TensorFlow, Named Entity Recognition(NER)

Tools & Platforms:

Streamlit, AWS (SageMaker), GCP, Git

Certifications

Learning Basic ABAP Programming – SAP Learning (2026)

Corporate Governance – Coursera (2026)

Business for Good – Coursera (2026)

Ethical Decision Making for Success – Coursera (2026)
